

## CO2 Performance ladder

### Emission inventory according to V3.1 - level 3

The foundation of the CO<sub>2</sub> Performance Ladder consists of periodic measurements, inventories, and evaluations of the CO<sub>2</sub> emissions produced by Taveirne. Taveirne achieves this by preparing a CO<sub>2</sub> emission inventory. This provides the company with insight into its energy flows and the corresponding CO<sub>2</sub> emissions.

### SCOPE 1 emissions / energy flow

#### TAVEIRNE EMISSION INVENTORY (prepared in accordance with ISO 14062-1)

ENERGY FLOW	Type of Energy	Unit	BASE YEAR		CO <sub>2</sub> Emission Factor 2023 (kg/unit)	CO <sub>2</sub> Emission Factor 2024 (kg/unit)	CO <sub>2</sub> Emission 2023 (Ton) - Grey Electricity Location Based	CO <sub>2</sub> Emission 2024 (Ton) - Grey Electricity Location Based
